

# Peter Laursen

- General field: Lyman  $\alpha$  radiative transfer
- One-pager last year: theoretical calculations of cold accretion
  - still working on this, but used model in Daddi et al. (2020)
- Old new at DAWN
- Lately have been modeling a proximate DLA
  - look out for Noterdaeme et al. (2020)
- Future: Less research, more coordination, web, and outreach
